

## Curriculum Vitae

|                            |                                                                                          |                                                                                     |
|----------------------------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| <b>Name</b>                | Jooyoung Park                                                                            |  |
| <b>Country</b>             | Korea, Republic of                                                                       |                                                                                     |
| <b>Current Affiliation</b> | Asan Medical Institute of Convergence Science and Technology, Seoul Asan Medical Center, |                                                                                     |
| <b>Department</b>          | Medical Engineering                                                                      |                                                                                     |

### Education Background

Asan Medical Institute of Convergence Science and Technology (AMIST, University of Ulsan) Seoul, Korea  
Master of Medical Artificial Intelligence Mar. 2021 – Present

Incheon National University (INU) Incheon, Korea  
Bachelor of Computer Science and Engineering Mar. 2017 – Feb.2021

### Professional Experience & Personal Honor

Excellent e-Poster award, Korea Digestive Disease Week 2021 Oct. 2021

Korea Human Resource Development Institute Seoul, Korea  
Lectured on Medical Image Detections; Python, Pytorch based code Hands On Sep. 2021

19th Place, ACM International Collegiate Programming Contest, ACM-ICPC Seoul Regional (Team DDUCK)  
Nov. 2019

### Main Scientific Publications

---

Kyung S, Shin K, Jeong H, Kim K, Park J, Cho K, Lee J, Hong G, Kim N. Improved performance and robustness of multi-task representation learning with consistency loss between pretexts for intracranial hemorrhage identification in head CT, Medical Image Analysis, 2022

Ga Hee Kim, Jooyoung Park, Seungju Park, Jeong-Sik Byeon, Hwoon-Yong Jung, Namkug Kim, Do Hoon Kim, Endoscopic diagnosis on eosinophilic esophagitis by using convolution neural network: A pilot study, Asian Postgraduate Course on Neurogastroenterology & Modality (APNM 2022), Oral Presentation

J.Y. Park, J.H. Noh, K.J. Cho, J.E. Hwang, D.H. Kim, N.K. Kim, Prediction of Depth Map from Real Gastrography Image with Style Transfer Networks and Virtual Gastrography, Korea Digestive Disease Week, 2021, Excellent e-Poster Award

J. Hwang, H. Park, J. Park, K. Do hoon, N. Kim, Morphological Complexity of Intrapapillary Capillary Loops For Predicting the Invasion Depth of Superficial Esophageal Carcinoma in Narrow-Band Imaging Endoscopy, United Europe Gastroenterology Week, 2021

Kim S, Cho S, Cho K, Seo J, Nam Y, Park J, Kim K, Kim D, Hwang J, Yun J, Jang M, Lee H, Kim N. An Open Medical Platform to Share Source Code and Various Pre-Trained Weights for Models to Use in Deep Learning Research. Korean Journal of Radiology. 2021
